

Installing instructions

Step. 1

This is all you need to mount your Bikeself on the wall.

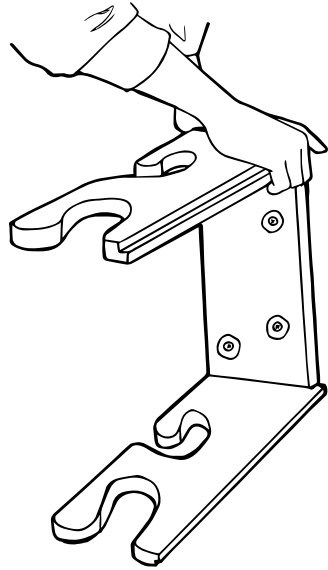

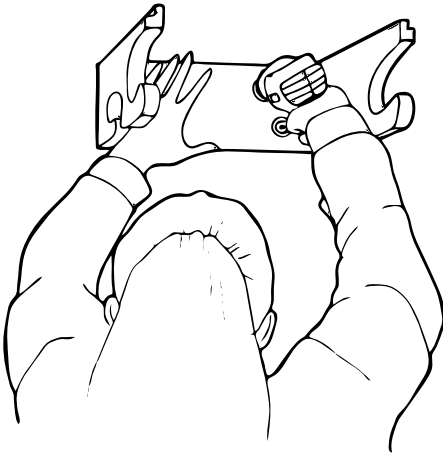

Step. 2

Grab the other side and the backside of the Bikeself. Join them together with a corner joint. Make sure that the track of the side is outwards.

Step.3

Repeat the same for the other side. This corner joint keeps the shelf sturdy so the joint might be tight-fitting.

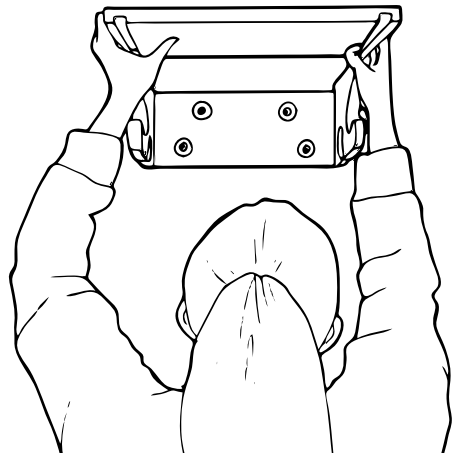

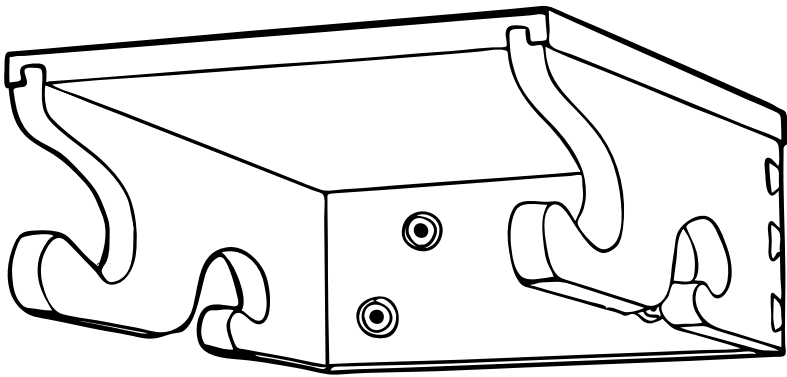

Step. 4

Measure the place you want to mount the Bikeself. Drill holes on the wall and tighten the shelf to the wall with the screws.

Step. 5

Slide the shelf on top of the sides.

And now Bikeself is ready to serve
you and your bike!
